SUMMARY

During my time at UCSD, I have developed strong project management skills, including the ability to thoroughly understand complex problems and ensure comprehensive testing for accurate solutions. My education and eight years of work experience have honed my ability to collaborate effectively in teams, creating structured plans to complete assignments on schedule. Through practical application during my 8 years of work experience, I have successfully delivered high-quality projects and gained valuable experience in efficient time management and teamwork.

EDUCATION

University Of California San Diego
Bachelors in **Computer Science**, Jacob's School of Engineering   March 2025
GPA 3.0

Imperial Valley College   June 2022
Associates in **Computer Science**
Associates in **Mathematics**
GPA 3.5

PROJECTS

- Worked on a team application called "Goal List by Context" using Android Studio
- Worked on a group Data Science project regarding the relationship between software engineering jobs and computer science degrees over the last decades in California.
- Developed a program that organized video and photo files by date and deleted any unnecessary files.
- Made a personal website using HTML, CSS and JavaScript

EXPERIENCE

Leadership Experience with Live Streaming, Sound and Light Engineering.

Jimmie Cannon Theater, El Centro, California   Aug 2016-Presently on Call
Theater Technician

- Made sure the theater's lights, sound and stage were preset before performances.
- Specialized in running and managing the sound, and live stream system.
- Set up a PTZ camera and learned how to control it, and retrieve video display by using a Wireless Router.
- Prevented any technical issues from happening and also was able to troubleshoot any issues that did arise.
- Contributed to the design and construction of theater sets, leveraging creative and technical skills to bring productions to life.
- Mentored new technicians
- Took pictures and videos of school performances
- Video Edited videos for the theater's YouTube channel

CODING SKILLS

- Java, Python, C, C++, SQL, JDBC, JUnit, HTML, CSS, JavaScript
- Arduino, Linux, Bash
- Git, GitHub, Github Project, VSCode, Android Studio

LANGUAGES

- English, Spanish
